About Me

I am Chloe Leukemans, a first year Multimedia Design student at the University of Johannesburg with a passion for creative problem-solving and visual communication. I enjoy exploring different areas of design, including branding, illustration, poster design, and publication design. Through both academic and personal projects, I have developed skills in Adobe Creative Cloud applications and digital illustration. I am committed to continuously improving my abilities while building a portfolio that reflects creativity, professionalism, and attention to detail.

What programs can I use?

What can I do?

Adobe

Procreate

- Poster Design
- Flyer Design
- Brochure Design
- Book Cover Design
- Business Card Design
- Character Design
- Logo Design
- Illustrations

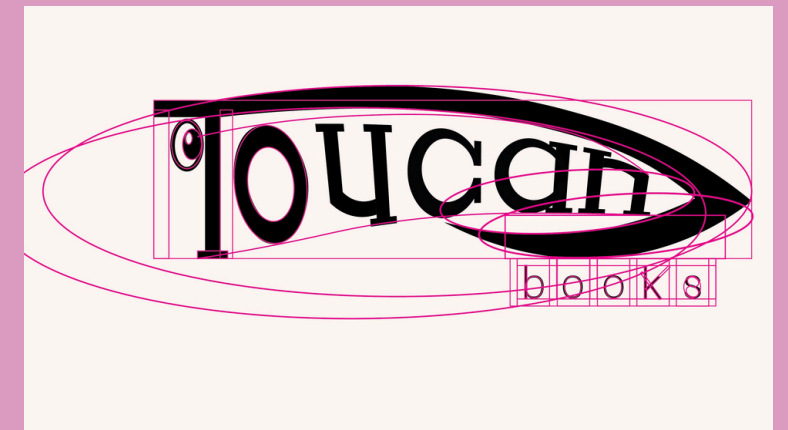

**Lets Get An Idea Of
My Work**

Logo Design

- Year: 2026; First Year Multimedia Design Student
- Software used: Adobe Illustrator & Adobe Photoshop
- About The Project: I was instructed to create a logo for a fictional brand. The brand I chose was “Toucan Books” a fictional publishing agency. This logo was developed as a branding project focused on creating a memorable and versatile visual identity. The design combines simplicity with strong visual recognition, using carefully considered typography and shapes to communicate the brand's values and personality. Particular attention was given to clarity, scalability, and adaptability, ensuring that the logo remains effective across both digital and print applications

Poster Design

- Year: 2026; First Year Multimedia Design Student
- Software used: Adobe Illustrator
- About The Project: These poster were designed as a collection to communicate information in a visually engaging and accessible manner. Through the use of hierarchy, colour, typography, and composition, the design guides the viewer's attention toward key messages while maintaining visual interest. The project was also designed to tell a different story about the event through the various posters. The project demonstrates my ability to balance creativity with effective communication and audience engagement.

Typography Dominant Poster

Typography-Only Poster

Image-Dominant Poster

Book Cover Design

- Year: 2026; First Year Multimedia Design Student
- Software used: Adobe Illustrator & Procreate
- About The Project: This book cover was created as a redesign of the original book cover created for the children's book written by Roald Dahl. The redesign captures the themes and atmosphere of the publication while appealing to its target audience. The design combines imagery, typography, and colour to create a strong visual narrative that reflects the content of the book. Careful consideration was given to composition and readability to ensure the cover remains impactful both as a physical product and in digital formats.

The image features a green and white checkered border that frames a central pink area. The pink area has a decorative, wavy right edge. The text "Thank You!" is centered within this pink area in a white, bold, sans-serif font.

Thank You!
